

Aqua: A Simple and Elegant Marp Theme

Here comes the second line.

Date

Name

Affiliation

How to use

1. Apply `aqua.css`.

- Change the logo by modifying `logo-url` and `logo-blue-url`.

```
--logo-url: url(path-to-your-logo.png);  
--logo-blue-url: url(path-to-your-logo.png);
```

2. The title page can be created with the `lead` class.

3. Also, we have an another style of the title page with blue background: `blue`.

4. As in the original theme `gradient`, we have a `tinytext` class.

This might be useful for the References slide.

5. Have fun!

Acknowledgement

This theme has been created by modifying and adding code to the theme `gradient`.

- Big thanks to the author.

The primary color (blue) of this theme is picked up from the [Marp's public blog page](#).

- And also the logo.
- Big thanks to the creator of Marp and those who contribute to the eco-system.
